

Re: **Single Session Smoking Cessation**

Dear Healthcare Professionals:

As a board certified clinical hypnotherapist, and the greater **Phoenix valley's leading smoking cessation specialist**, I help people **stop smoking** in a **one session**. When understood that smoking is not an actual addiction but instead a behavioral pattern that can be remedied, the very unhealthy smoking/tobacco problem disappears.

I offer your patients:

- a **rapid, effective, and affordable** alternative to traditional and pharmaceutical smoking cessation options (re: cigarettes, e-cigarettes, cigars, pipes, chewing tobacco, and marijuana).
- **hypnotherapy combined with neuro-cognitive therapy** that offers a 90-95% proven success rate as demonstrated over the last 10+ years. Traditional options, such as patches, pills, gum, lozenges, inhalers, nasal sprays, and counseling offer less than an 11% success rate with many potential side effects.
- **one single session** with a **lifetime guarantee**. This means that if that patient ever smokes or has a craving to smoke, I will treat that patient again free.

Because there are no drugs, withdrawal, or side effects, patients rapidly move forward with important medical procedures and treatments with optimized oxygenation levels, lower pain perception, increased wound healing characteristics, as well as reduced back pain, pulmonary risks, cancer, disability, and much more.

Included with this letter are a page of testimonials and a page for the smoker/patient describing the benefits. Feel free to print and distribute the smoker/patient page anytime you recommend Stop Smoking and Thrive.

Per your request, I will provide a written report regarding the results of any patient you refer to me. And, of course, I will always act in a professional manner befitting a referral from you.

My success is your success is your patient's success. For additional information or marketing materials please contact me at (415) 310-3282 or (800) 289-0875. Also you can read my bio and see photos of me and my office on my webpage.

To good health,
Jules Levin, BCCH
